## Projects

| | |
|---|---|
| **ResponsivePortfolio** | TheBestwaytoShowcaseourskillstoclientsandcompaniesisourCvorportfolio. I made this project using Javascript, React as native, SCSS and Sanity. My learnings from this project are huge some of them are functional components of react and their reusability, React files and folder structure, use of Scss, Flex and Animations, and more importantly Sanity to manage the content of entire application. |
| **MERNE-commerce** | Bybuildingthisprojecticoverallmymernconcepts.Thisapplicationisbuildup using Javascript, React, NodeJs, Redux Toolkit, MongDb.It also include payment gateway and emailing system.This is a fully functional application helping us to shop new items and stores your data about same. |
